**Code of Conduct of the swiss aerospace cluster with regard to antitrust regulations****Purpose of the association**

- The association swiss aerospace cluster aims for the non-material promotion of the Swiss aviation, aerospace and satellite navigation industry (industry, suppliers, research and development institutes / universities, trade and services) and
- the establishment of a non-commercial industry network (cluster) as well as
- the support of innovations and the uniform marketing presence.
- Moreover, the association can conduct all business which the purpose entails or promotes the purpose.

The swiss aerospace cluster therefore expressly commits to compliance with the following rules of conduct:

- Members of the association's bodies represent the interests of the association within the framework of their activities for the association, not those of their own or another employer.
- Make accessible to members and their delegates or exchange about this or collect or record for these purposes, which are suitable to restrict competition. These are in particular information about prices, price components, margins or similar.
- Minutes are kept of the gatherings and meetings, with participant lists. The minutes are to be made accessible to all participants in a suitable form in a timely manner. No minutes are created for further training or educational events such as modules, network and ERFA events.
