will shape the forum

Where Aircraft, UAS, Operators and Missions Meet

 PAYERNE, SWITZERLAND

| DATE TBC

CONCEPT-STAGE INDUSTRY OUTREACH

A mission-driven forum for the Swiss aeronautics' ecosystem

We are assessing industry interest in a new Swiss event built around real operational missions rather than aircraft categories. The concept combines live flight demonstrations, operational use cases, technology showcases, industry booths and targeted networking.

The goal is to connect organizations with an operational need directly with the companies that can provide, operate and enable the solution.

WHO WE WANT TO HEAR FROM

Aircraft & helicopter
OEMs

UAS manufacturers
& operators

Mission-system,
payload &
communications
providers

Government,
defense,
public-safety and
commercial
stakeholders

R&D, production,
service providers &
other industry
participants

FROM TECHNOLOGY TO OPERATIONS

HELP SHAPE A FORUM THAT DELIVERS REAL VALUE

We are identifying potential partners, sponsors, exhibitors, demonstrators and end users before formal event planning.

Tell us how your organisation could participate and help create a forum that meets your needs!

HOW YOU CAN PARTICIPATE

- Sponsor / partner
- Exhibitor / booth
- Aircraft or technology demonstrator
- Presentation
- Visitor

WHAT YOU WILL GAIN

- Real-world mission focus
- Cross-sector collaboration
- Access to key stakeholders
- Hands-on demonstrations
- Actionable outcomes
- Targeted networking
